

Production Operative

Average hours 42 pw L1
Full-time – shifts, inc nights (4-on/4-off)
Longbridge, Birmingham - £18-20,000

This is an opportunity for experienced production operators to join an innovative independent plastics manufacturer. Aquapak Polymers is a new technology business, based in a brand-new facility in South Birmingham. This role is working 12-hour shifts, with an average of 42 hours per week and is salaried.

Duties include the operation of a variety of extrusion machinery to produce polymer pellets through standard operating procedures and safe, hygienic working practices. You will also be able to input and record all relevant data and understand the importance of quality standards and continuous improvement.

Our ideal candidate will be an experienced machine operator, with at least 2 years' experience in a manufacturing environment. You will be a good team player, be ready to learn and take part in training to be able to deliver our processes to the highest standards. Previous experience of 5 S's, continuous improvement techniques and quality systems will be an advantage as will a mind-set of excellence, safety and good communications.

This is an excellent opportunity to join a growing business, with prospects for advancement and be part of a great team!
